

MANUFACTURE OF THE POLYMER MATERIALS SHEETS PRODUCTION

Pavlohrad

Project information

- **Project description:** Creating a new enterprise for the sheets production of polymer plastic sheet of polyethylene, polypropylene and other polymer materials.
- **The cost and period of project realization:**
 - estimated cost: **\$ 4,3 mln;**
 - estimated implementation schedule: **8 years.**
- **Initiator resources for the project implementation:**
 - machinery, office equipment – **\$ 30 thous.;**
 - experience in the relevant projects implementation and project solutions.

Project product

Polymer plastic sheet of polyethylene, polypropylene and other polymer materials using automated line type EXT */120/*.

Project niche

Today these products are imported to Ukraine. At start own production of a full cycle, the selling price per sheet will be 3.5 euro/kg, and in the complete cycle will be up to 20 euro/kg. Delivery schedule of raw materials supply for the production of polypropylene and polyethylene sheets provides cooperation with both domestic producers and foreign.

Form of cooperation

- Credit, venture capital;
- Other joint activities – creation of a joint venture.

Project initiator

Ukrkhimzakhyst Ltd, www.anticor.dp.ua, www.anticor.all.biz/#

Activity type: engineering, design, production tanks of polymer materials, anti-corrosion coatings.
